Custom Brickslot
Michael Vergason Landscape Architects, Alexandria, VA
Tompkins Builders, Washington, DC

The American Veterans Disabled for Life in Washington, DC is the first memorial in the US to honor disabled veterans.

As part of the Memorial 48 laminated glass panels form 3 displays illustrating soldiers' stories through quotations and photographs. Along the base of the glass displays a discrete trench drain was required to ensure pedestrian safety and to maintain the memorial's aesthetics.

A customized version of ACO Brickslot was selected - customized to accept the 4 inch thick granite paver and bed. The discrete slot provides effective drainage without detracting from the messages and symbols displayed on the glass monument. This customized Brickslot was installed on ACO Drain K100 channels.
